

25 CAREER IDEAS

Write down a list of five things you love to do across the top of the grid below. These will comprise the main subject areas and should be nouns - such as cookery, art, sailing and computers.

Now write down another list of the five things you enjoy and do well in the left hand column under 'I am good at'. These words should be doing words, or gerunds, that end in *-ing*.

Finally, you need to pair up the words on the vertical axis with the words on the horizontal axis. If you look at the filled in example below you'll get an idea of how your grid should look. You will have 25 pairs of words that should inspire your thinking towards possible career options. There is an example of my (Jo's) completed grid.
